Floods – Basic Health & Safety :30 PSA

Floods can turn your house into a home for germs. Here are some basic tips for keeping yourself safe during floods. Clean your hands often with soap and water or a hand sanitizer.

If your private water well got flooded, drink bottled water from a store, or boil your water for at least one minute before drinking it.

And throw away any food that was exposed to flood waters, or didn't stay cold while the power was out. Eating it could make you sick.
