## Key Messages for ECHO Show #18 “What’s Fishy About Mercury?”

**Finalized Script Deadline: Friday, February 17<sup>th</sup>, 2006**

**Translation Deadline: Tuesday, February 28<sup>th</sup>, 2006**

**Translators:** Translate only the words not “number 1, number 2, number 3”. Please contact Larry Bogoslaw with any questions. Good luck work!

- Number 1:** Mercury is a pollutant found in our air and water and ends up in the fish we eat.
- Number 2:** Eating fish is healthy, but because mercury is found in some fish, we need to limit what fish we eat and how much we eat.
- Number 3:** Keep mercury out of the environment by taking used florescent bulbs and thermometers to household hazardous waste sites.
