“Household to Hazardous Poisons” Show # 3 Key Messages (MTL to translate by August 25th, 2004)

KEY MESSAGE #1:

Household poisons can be dangerous and should be labeled and stored safely and out of the reach of children.

KEY MESSAGE #2:

Chemicals used in industry can also be dangerous if they accidentally spill or are used by someone to cause harm. Stay uphill and upwind from chemical explosions.

KEY MESSAGE #3:

If you suspect someone is sick from household or hazardous poisons call 9-1-1 or the Poison Control System for help 1-800-222-1222.
