From the Executive Director:

Community and Outreach – two of the words in the acronym ECHO – were really the highlights of ECHO’s work in 2012. In our fourth year of service as a nonprofit organization, ECHO had established a strong network of 150 partnering organizations statewide and 60 bilingual spokespeople. With those tremendous assets, ECHO was able to put into place a sustainable community outreach model that brings ECHO’s educational materials directly to limited English proficiency community members through thoughtful engagement.

Two examples of new projects developed in 2012 highlight ECHO’s innovative community outreach. With Hennepin County, ECHO created a Cultural Services Unit in Brooklyn Center, which came to fruition in 2013 to support community recovery outreach efforts to limited English proficiency and New American communities. Another project developed in 2012 was the Home Fire Safety Visit effort to limited English proficiency households in Hopkins. Together with the Hopkins Fire Department, ECHO’s bilingual spokespeople planned to approach and visit homes to ensure proper fire safety precautions and detectors are in place.

Together with the staff and board of directors, I couldn’t be more proud of the dedication of each of ECHO’s spokespeople and partners. As a community we were able to mobilize existing community groups and efforts to make a difference in the preparedness, safety, and health of so many new Americans.

As ECHO grows in popularity for New Americans in Minnesota and beyond, we are excited to be a part of the educational movement that is helping so many immigrants and refugees to learn critical health, safety, emergency preparedness, and civic engagement information.

Thank you for your support of ECHO’s work and for helping our community to be healthy, be safe, and be ready!

Lillian McDonald
Founding Executive Director
ECHO’s Strategic Plan

In 2012, ECHO unveiled a new three-year strategic plan. The board of directors, staff, spokespeople and volunteers collaborated to follow the goals of this strategic plan, which are to:

1. Deliver vital programs and services to help people with limited or low English proficiency become healthier, safer, prepared for emergencies and self-sufficient.
2. Reach more people in ECHO’s target communities efficiently and effectively.
3. Expand ECHO’s geographic reach.
4. Grow ECHO’s visibility and brand.
5. Build ECHO’s organizational capacity to support and sustain growth.
6. Ensure ECHO has the financial resources to sustain its growth.

ECHO’s mission is to collaborate with diverse communities to deliver programs and services that help people be healthy, contribute, and succeed.

ECHO’s 5 Program Areas

1. Health & Safety Education
   These programs present foundational information in a culturally relevant and accessible way to motivate behavior change.

2. Civic Engagement & Self-Sufficiency
   As individuals acquire education and knowledge, they also acquire the ability to speak on their own behalf and on behalf of their community.

3. Community Engagement & Outreach
   ECHO partners with people and organizations to discuss community challenges and find ways to address them that are culturally and linguistically appropriate.

4. Emergency Response & Preparedness
   ECHO maintains an emergency communication infrastructure so when needed, critical information can be delivered to LEP communities statewide.

5. Training & Research
   ECHO offers cultural competency training, community surveys, risk assessment, and focus group services to those trying to better reach and serve LEP community members.
Health & Safety Education

These programs present foundational information in a culturally relevant and accessible way to motivate behavior change.

“Understanding the Emergency Room” was a television program and classroom curriculum teaching proper use of the ER.

Impact on Cultural Communities

• The ER program and associated curriculum resulted in a marked increase in the number of students who understand the appropriate uses for primary care clinics, urgent care, and emergency rooms.
• There was an increased awareness about the importance of establishing primary care and availability of multicultural and low-income resources to 887 diverse community members through a holistic multicultural public awareness campaign.
• ECHO provided 548 DVDs to hospitals and clinics as a multicultural ER education tool.

Civic Engagement & Self Sufficiency

These programs empower LEPs by going beyond basic health and safety needs and increasing self-sufficiency.

“Domestic Abuse and Your Safety” was a new multicultural program on domestic and family violence. After viewing the “Domestic Abuse and Your Safety” program and completing the related curriculum, students demonstrated the following outcomes:

• There was a 25% increase in number of students able to correctly identify what constitutes domestic abuse.
• 100% of the students were able to correctly identify examples of sexual assault, an increase of 20%.
• 35% more students were able to correctly identify what to do if someone was in immediate danger of domestic abuse.

“Voting and the Democratic Process” was an educational TV/DVD program was developed in four languages.

• After watching the video, correct answers for the question of “how do you register to vote?” increased by 23%.

“I can help someone else to vote. I can interpret. I can volunteer and campaign.”
- Latino Resident, Willmar
Community Engagement & Outreach

_ECHO partners with people and organizations to discuss community challenges and find ways to address them that are culturally and linguistically appropriate._

ECHO attended a total of 86 events in 2012, including 12 Health & Safety Events, 28 Ethnic Events, and 46 Community Meetings.

ECHO added _36_ Partner organizations who participate on varying levels including; Supporting Partners, Distribution Partners, and Emergency Partners; bringing the total of ECHO Partners to _151_ organizations at year end.

Emergency Response and Preparedness

_ECHO maintains an emergency communication infrastructure so when needed, critical information can be delivered to LEP communities statewide._

“Operation Medicine Delivery” was an exercise that aimed to see how fast medicine could be delivered to people’s homes in an emergency. ECHO was contracted by the Minnesota Department of Health (MDH) to develop pre-event multilingual communications and activities so non-English speaking community members living in the ZIP codes were aware of the exercise and emergency preparedness initiatives.

Training & Research

_ECHO is unique as it’s the only organization in Minnesota that regularly brings together up to eight different cultures to discuss critical concerns of each community and look for ways to enhance communication and information dissemination._

ECHO provided cultural awareness training for some Medica staff focusing on considerations for ethnic groups and medical care and also provided them with a “Cultures at a Glance” worksheet.
Impact Measurements

ECHO’s short PSAs and Videos received a total of 26,415 views in 2012.

ECHO programs played 1,256 times on tptLIFE and tptMN in 2012. ECHO averaged 2,116 viewers per language program broadcast.

There were a total of 28,050 visits to the website. Of these 71% were new visits.

ECHO grew English Twitter followers by 66% in 2012. ECHO had 209 retweets and mentions that reached 285,482 people.

ECHO sent 58 emails in 2012 to a total of 105,056 people.

Somali was the most popular language in which YouTube videos were viewed with nearly 62% of the total views. Second most popular was English with 13% of the total views.

ECHO distributed a total of 10,479 DVDs in 2012. 19% of these DVDs were distributed via outreach events. 81% of these DVDs were distributed via communications/online orders.

ECHO distributed a total of 10,479 DVDs in 2012.
