

ECHO Key Messages

Emergency and Community Health Outreach

Key Messages for ECHO Show #20 “Avian Influenza in Birds (Bird Flu)”

- Number 1:** Avian Influenza is mostly a disease of birds, not people.

- Number 2:** Watch your birds carefully, and report sick or dead birds to the United States Department of Agriculture.

- Number 3:** You can help reduce the probability of bird diseases like avian influenza by practicing “backyard biosecurity” (keep term in English, please!).
