

Digital & Cable Statewide Coverage

education

MINNESOTA PUBLIC TELEVISION ASSOCIATION (MPTA)

The MPTA includes the six organizations providing PBS television services to the residents of Minnesota. Effective February 2008, **all** members of MPTA are broadcasting the digital MN Channel program service. Partner programs can be accessed through over-the-air digital or cable channels. Because each station is independently owned, the MN Channel's name varies by carrier. Each station offers an on-line programming grid that viewers can customize by their specific provider. The information below details where to find the MN Channel statewide.
